KNITTED IN SWEDEN
SINCE  1896

KNITTED IN SWEDEN

Welcome to Sättila!

Working with Sättila is very easy. We still have our production in Sweden and you can actually see the name of each knitter in every hat! From our warehouse we can supply all over Europe very quickly. We would love to help you put a workable range together for your shop. We have extensive experience in selling hats and we know what works.

Our qualities

Merino wool is a very soft quality and it's perfect to use for knitted hats. All merino wool we use is mulesing free. A knitted beanie made from merino wool does not need to be washed in order to remove the odour. It is perfectly possible to ventilate the beanie and make it fresh that way.

Lambswool is a popular quality in our lifestyle collection, it's fine and soft, the yarn is mixed with polyamide for best quality.

Our Organic Cotton Yarn is GOTS and Oeko-Tex certificated. We work with organic cotton in our beanies because of its superior quality, durability and of course of the environment. The cultivation of organic cotton without pesticides makes it grow more slowly and that gives longer fibres and better durability to the yarn.

Dri-Release®/merino

Dri-release® combines the best features of natural and synthetic fibres. The material transport moisture from skin, from inside, to the outside. The polyester is recycled and twisted together with the merino yarn. This makes the product dry very quickly.

Coolmax®/merino

The Coolmax®/merino blend is a high tech yarn used in several of our Vision beanies. Coolmax® gives a superb moisture transport and together with the merino the temperature stays perfect.

Recycled

The yarn is from re-used garment fibres. Old garments are cut down to thin fibres and spun to yarn again. We have used recycled denim in two yarn qualities for several years and our new quality is the recycled wool in a tweed look.

Acrylic is a synthetic fibre and in combination with wool the acrylic fibre helps the wool to be washable without any extra treatment.

Gore Wind Stopper is used as membrane in many of our Outdoor beanies. Gore Wind stopper membrane is breathable and blocks the wind out.

Polycolon® is a functional yarn, used as a inner layer into the beanie and transport moisture from skin to the outer layer during your activity.

Delivery drops

Order deadline

- ① Early autumn, 2nd half August 2018.
Order deadline 2018-02-28
- ② Autumn/winter, 2nd half September 2018
Order deadline 2018-02-28

Stockservice

● Products marked with this dot will be in stock from given delivery drop and during season. For larger orders please contact your sales contact at Sättila.

Sättila Vision function

VISIBILITY

Reflective yarn or high visibility yarn certified according to EN 471 (the orange and yellow).

ACTIVE

Breathable and moisture wicking beanies. Helps you feel dry and comfortable during intensive activity.

WARM

Keeps you warm during low-pulse activities.

Packing

All hats are sold 3 pcs/article. Only the heavy gauge beanies are packed in plastic bags. Because of the environment we avoid plastic bags for the rest of the articles.

VISIBILITY

To be visible helps you to feel safe and secure and focus on the activity.

Stable VISIBILITY features offer reflective details to make you visible during your performance.

ACTIVE

High power activities such as running, skiing or other outdoor activities create "warm" heat requirements.

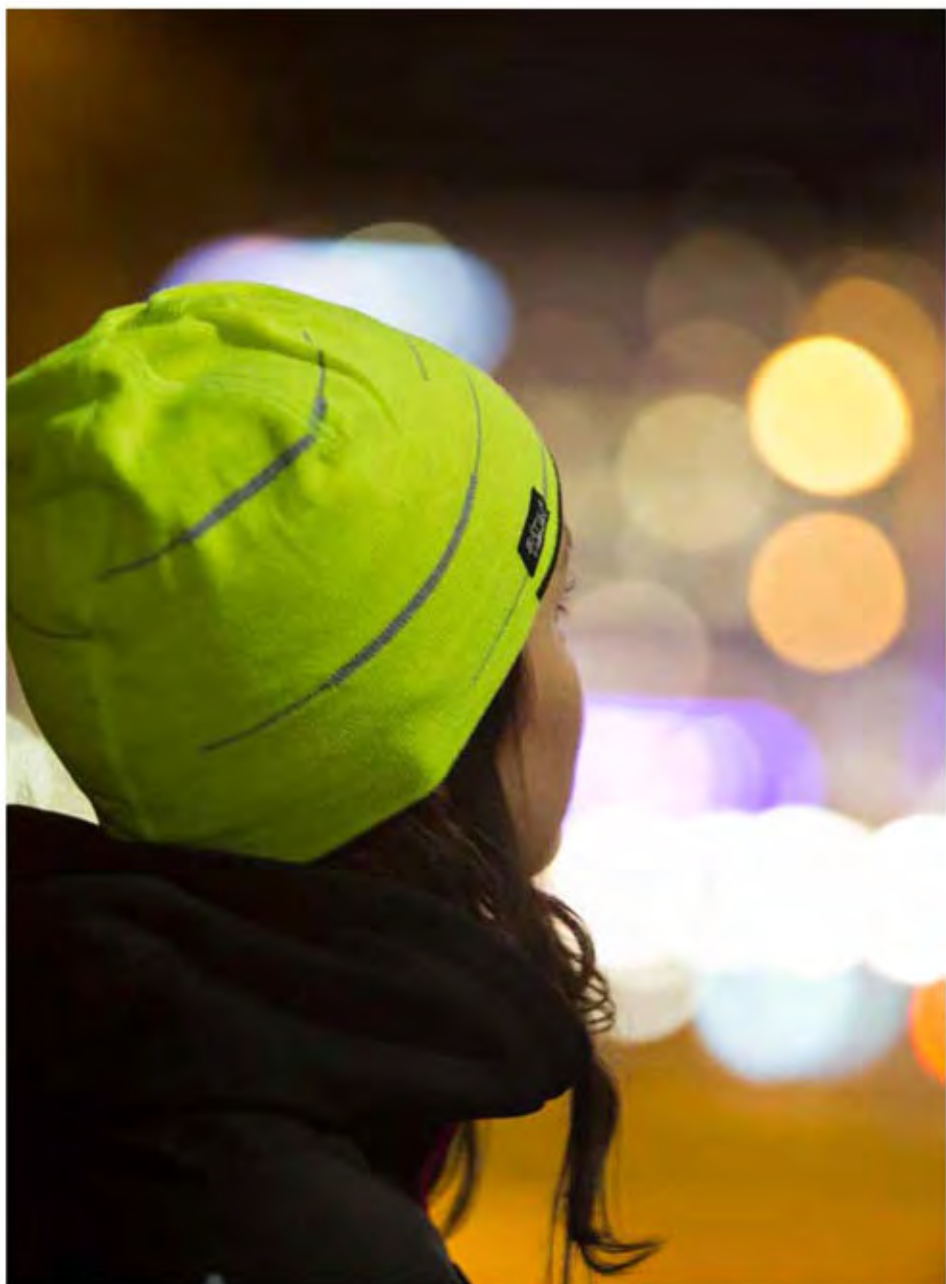

SELECTIVE features offer high conductivity and moisture wicking properties to help you feel cool, comfortable during your activity.

WARM

The cooling behavior is much more effective, if the warmth is comfortable. Always wear and maintain these features properly to reach the best feeling.

It takes the help of 100% cooling the most cool - better than ever.

SÄTILA

KNITTED IN SWEDEN

SINCE  1896

We have knitted hats in Sweden for more than 120 years. Our company, Sätilla of Sweden, was founded in 1896 in the small village of Sätilla, in the countryside of southern Sweden. Since that November day, we have designed, produced and supplied knitted hats, scarves and mittens, all knitted in Sweden. And we still do, at the same exact location.

Welcome to Sätilla!
